

ABOUT ME

Software engineer with a true passion for improving my surroundings. Talent multiplier and thrive when put in positions of leadership. Enjoy approaching development with a full-stack mentality and making iterative improvements on development methods, tooling, CI/CD, team organization, testing, and application performance/design.

Have a strong track record of learning technologies new to my company and solidifying development practices around them. Functioned as a technical leader with a full-stack viewpoint leading teams with technology-specific engineers.

In my personal projects and development, I have enjoyed learning React, React Native, and node.js. Check out my website below to see a few of my projects and learn more about me!
